ITL 1-2011 Errata to 2015 Update

Although each version of the ITL has been submitted to careful proofreading by the Editor and the COI, errors do sometimes go undetected. When it is determined that a published version of the standard contains an error or errors, an errata sheet may be published at the discretion of the Editor.

Errata are considered text erroneously published in the ITL or its Supplements that does not accurately reflect the intended requirements as approved by the COI. This errata sheet is intended to correct errors and alleviate potential confusion. In each case, the object is to promote accuracy, clarity, consistency and thoroughness.

The issuance of an erratum does not lessen the value of the original publication. Since the majority of ITL content is unaffected by errata, an errata sheet should be viewed as a supplement to a viable publication.

An Errata XML schema is posted on the ITL webpage to ensure that ITL users receive Errata information in a timely manner, and these changes will be incorporated into the next revision of the standard. Adoption of this schema is considered conformant to ITL-2011, and is recommended for all implementations of ITL 1-2011.

The affected fields are:

Field	Issue	Update
Foreword to 2015 update on page xxii 3rd and 8th paragraph	Please specify the currently approved version of NIEM before publishing the 2015 update.	Following efforts and consensus of the XML WG NIEM 2.1 and 4 are the versions approved.
Introduction 6th paragraph	Please specify the currently approved version of NIEM before publishing the 2015 update.	Following efforts and consensus of the XML WG NIEM 2.1 and 4 are the versions approved.
Table 36 4.003	Impression type range value constraints inaccurate	Range should be 41 < IMP < 42
Table 42 9.302	Missing FGP Value Constraints	Should also include range 60 ≤ 79
Table 42 9.321	DTP Condition Code	Should be O ↑ (Optional)
Table 42 9.335	RCC Condition Code	Should be O (Optional)
Table 42 9.357 and 9.360	LQP Polygon Occurrence, AOP Polygon Occurrence	Occurrence minimum should be 3
8.9.6	Title of section should include the word legacy	Change from Externally defined feature sets to "Externally defined legacy feature sets"
8.9.7.3	First bullet in this section should include missing references	Add "60 through 79 (inclusive)" to valid codes for FGP
Table 70	Wrong acronym	Replace LPCT with "LPCD"
Table 71	Redundant comments in Frontal-C; add Right Arm to Image Type	Remove second Not applicable, and image comment under description; add Right Arm to Image Types

_	T	
8 Record Type Specifications 99.101	"Shall not contain leading zeroes"	Replace shall with "should"
8.10.45 Under Table 83 1st and 2nd bullet	Update acronym in 1st bullet; remove additional word in 2nd bullet	Lip contact liner descriptor is LCLD; Delete "descriptive" (LPCT)
8.10.45 5th bullet under Table 86	Wrong acronym	Lip print comparison descriptive text is LPCD (not LPCT)
Annex C 1st para	Update NIEM refence	Update to read "NIEM 2.1 and 4"
Table 107 Type 16 16.994 EFR	The Character Type for this field is B, but all other EFR fields have a data type of U.	Correct character type for 16.994 EFR to "U"
EFR and DATA fields	Some EFR and DATA fields have a minimum occurrence of 1. However, fields with a Dependent condition code always have a minimum occurrence of zero.	Change the minimum occurrence of the following fields to zero:
EFR and DATA fields 10.029 FPC Table 78 ISO definitions of the anthropometric landmarks	Currently the following conditions exist:	EFR: 13.994, 14.994, 15.994, 16.994, 17.994, 19.994
	10.994, 11.994, 12.994, 20.994, 21.994, 22.994 – minimum occurrence of 0 13.994, 14.994, 15.994, 16.994, 17.994, 19.994 – minimum occurrence of 1 11.999, 12.999, 14.999, 15.999, 17.999, 19.999, 20.999, 21.999, 22.999 - minimum occurrence of 0 10.999, 13.999, 16.999 - minimum occurrence of 1	DATA: 10.999, 13.999, 16.999
	The Feature Point ID (Table 78) can include values that are only 1 character in length. For example, 'v' (vertex) and 'g' (glabella). The current minimum length is stated as 3. The MPEG4 Feature Point for the Feature Point ID of "go" is listed as 2.15 and 2.16.	Change minimum length to 1 to include allowed Feature Point ID code values for 10.029 information item FPC. Correct MPEG4 Feature Point for the
	However, these points in Figure 14 and disagrees with ISO/IEC WD 39794-5 Extensible biometric data interchange formats – Part 5: Face image data which has values of 2.13 and 2.14.	Feature Point ID of "go" to 2.13 and 2.14. Correct spelling "mandibular"
E.3.4 and E.3.5 Exposure	Exposure range in both sections should be 0.05 to 1.5	Update 0.5 to 0.05 neutral density
